

## Aims of the course:

This course introduces students to the theories and methods of Psychology. It offers them the opportunity to look at some of the explanations psychologists provide in trying to understand humans and their interactions with the world.

The course aims to develop both students' psychological skills and their psychological knowledge. Students study a variety of psychological research studies that represent the range of psychologists' interests and the methods they use.

## What are lessons like?

Lessons are varied and activities are chosen to suit the theory / topic. You can expect to experience the following during the course of the full two year programme:

- Observations
- Group work
- Presentations
- Timed response
- Visits
- Essays
- Practical investigations
- Internet research
- Interactive quizzes

## Cost of the course:

A core text book will be recommended costing approximately £20.00.

## Recommended Prior Learning:

Owing to mathematical content in the course a good standard of mathematics is expected for entry onto the course, grade requirements to be confirmed.

## Where can this course lead to?

The obvious progression from studying A-level Psychology is continuation at degree level. However, the course also offers the development of skills which will assist in most careers.

The unit Criminal Psychology is particularly relevant to a career in the Police or Legal field. Mental Health psychology will provide a good understanding of health care and clinical practices.

## Why choose to study Psychology at St Mary's?

Over the last 5 years Psychology has consistently been a top performing A Level at St Mary's College. Throughout the course you will develop a basic level of understanding of the field of psychology through the use of varied teaching and learning approaches. Ranging from traditional teaching methods, you will also have the opportunity to conduct your own research. Group work plays an important part during the course and visits to places such as the local court also provide practical experiences of this applied science. Above all Psychology offers you a chance to gain answers to questions that all of us consider throughout life – why we behave like we do and what influences our behaviour.
